JOIN US TO:

- Learn how to ensure the safety of our kupuna and loved ones with dementia.
- Explore common themes associated with wandering, and how to reduce wandering risk.
- Learn how the Hawai'i Chapter is working to implement a statewide Silver Alert program to protect our kupuna if they go missing.

Did you know? Six in 10 people living with dementia will wander at least once, and many do so repeatedly. Although common, wandering can be dangerous — even life-threatening — and the stress of this risk weighs heavily on caregivers, family, and our island communities. Gain insights and strategies from Dr. Poki'i Balaz and the Alzheimer's Association on how to keep our kupuna safe.

Dr. Poki'i Balaz, DNP

Geriatric Brain Health Specialist
& Family Caregiver
